WHEN IT COMES TO SULFONAMIDES

A STRONG VIRUCIDE AND BACTERICIDE YET MILD TO SURFACES AND EQUIPMENT

HALAMID®
THE UNIVERSAL DISINFECTANT

Thermal Foggers

- Thermal Fogger commercially available from for example:
 - Pulsfog
 - Pestline
 - Vectorfog
 - Egeba
 - Smartfog
- Fogging may be done with handheld and stationary foggers. The solution tank may range from 5 to 1000 liters.

Thermal Fogging

- How does it work

A STRONG VIRUCIDE AND BACTERICIDE YET MILD TO SURFACES AND EQUIPMENT

HALAMID®
THE UNIVERSAL DISINFECTANT

Further equipment

- Weighing equipment

- Mixer

- Bucket

A STRONG VIRUCIDE AND BACTERICIDE YET MILD TO SURFACES AND EQUIPMENT

HALAMID®
THE UNIVERSAL DISINFECTANT

Solution Preparation

	Normal	Alternative
HALAMID®	1kg	1kg
Water	10L	8L
MPG (monopropylene glycol)		2L
Mix till clear solution	✓	✓

- Addition of <20% MPG will result in more persistent thicker foam
- 20% MPG is the maximum

HALAMID®
THE UNIVERSAL DISINFECTANT

Fogging procedure

Fogging flow rate:	1-2L/ min
Exposure time:	30-120 minutes
Ventilate:	30-120 minutes

A STRONG VIRUCIDE AND BACTERICIDE YET MILD TO SURFACES AND EQUIPMENT

HALAMID®
THE UNIVERSAL DISINFECTANT

Quantities/Usage per Volume

- Apply 0.5 kg HALAMID® (5L of 10% solution) per 1200m³ of internal volume.

Size barn (internal volume m ³)	(Average corresponding floor area m ²)	Before No disinfection step wet spray 30m ² /L		Before With disinfection step wet spray 60m ² /L	
		Volume used (of 10% sol'n) Fogging	Corresponding amount of HALAMID® used	Volume used (of 10% sol'n) Fogging	Corresponding amount of HALAMID® used
1,200	300	10L	1kg	5L	0.5kg
4,800	1,200	40L	4kg	20L	2kg
12,000	3,000	100L	10kg	50L	5kg
